OUR STORY

Our company is unique.

We are first and foremost squash pros...we know squash. David Palmer (President) does not need any introduction, Ray Lindsay (Managing partner) has played and coached squash for over 30 years. Jeff Young and Bryan Patterson are both well known in their respective areas.

This brochure showcases Black Knight USA's products for 2015/2016. For any questions, please email us/phone us.

All the best.

NANO CRYSTALLINE TECHNOLOGY (NCT)

which is an additive incorporated into the carbon fibre that not only helps reduce vibration but binds the fibres for added durability.

BK'S THERMAL CORE TECHNOLOGY (TC)

in which the racquet is pressurized with superheated air while it is being cured in the ovens. This allows for a uniform curing process inside the frame and out for greater durability and a more responsive hit.

POWER OF 6

this frame is fine-tuned for optimum performance by first analyzing it under stress at 6 points, from the handle to the top of the head. The resulting data are then used to make further adjustments to the frame until the ideal specifications are achieved.

16K FIBRES

the highest standard of graphite available -16,000 individual strands woven together for more structural strength.

POWER SURGE

drives the power of the swing towards the racquet head while cutting vibration and adding stiffness to the shaft. It can be seen on the sides of the shaft.

Grips

RAD CUSHION

Exceptional gripping performance from dry to wet. You have to try the new RAD grips from Black Knight to really appreciate how a great grip can improve your game.

RAD WRAP

An overgrip that will allow you to improve your hold on any racquet. At 0.6 mm, it makes only a small difference to grip size.

T.U.F. GRIP

T.U.F. - The Ultimate Feel. Designed with a special EVA foam ridge running the length of the grip, & coated with polyurethane. This grip adds a third dimension to grip comfort and security.

SUPER GRIP

A self-adhesive replacement grip, Super Grip has a tacky polyurethane (PU) coating over a cotton base, designed for extra long performance. Its tackiness assures a solid grip and its cushioning ensures a nice comfortable feel for the hand.

EQUIPMENT

Grips

RAD MESH

Perfect for tennis, squash, badminton, racquetball, hockey sticks, golf clubs and baseball bats. Anywhere you need a secure grip.

TRU-BOUNCE SQUASH BALLS

Black Knight's Tru-Bounce balls are the result of many months of testing and development in order to create a double yellow dot squash ball that matched the speed of the current standard tournament ball, but surpassed it in terms of consistent performance and durability. Those goals have been achieved with the new Tru-Bounce squash balls from Black Knight.

colour options

Balls

EZY SQUASH BALLS

The ezy ball is fantastic for children and beginners, it bounces higher and stays in the air longer.

Comes in a pack of 3, and is a bright orange color 2.5" in diameter

Racket Bags

BG 638

This racket length bag has three zippered, racket shaped sections suitable for squash or badminton rackets. With 2 wet-lined, vented pockets accessed with zippers at the bottom of the bag. Additional flat pockets are built into both sides of the bag.

Perfect for people who are looking for a medium sized bag that can organize a lot of racquets and other gear, and who appreciate the hands-free ease of a comfortable backpack.

 colour options

BG 637

This racket length bag has two zippered, racket shaped sections suitable for squash or badminton rackets. With 2 wet-lined, vented pockets accessed with zippers at the bottom of the bag. Additional flat pockets are built into both sides of the bag.

Perfect for people who are looking for a medium sized bag that can organize a lot of racquets and other gear, and who appreciate the hands-free ease of a comfortable backpack.

- Wider base at the forefoot and board lasted construction for better stability.
- Design of the outsole is made for quick lateral and forward movement.
- Sizes from 7- 13 inc halves up to and inc 11.5

Saxon SX900

Saxon shoes are Developed and Designed in Germany. They are made specifically for Indoor Racquet Sports. They are not a Volleyball shoe or a Floor Ball shoe. All sports have different actions and movement's and Indoor racquet sports with the short court distances are very unique. The most common way players stop and decelerate efficiently on court is by performing a lunge. Given the speed at which Indoor Court Racquet Sports are played at today means the ability to decelerate and change direction is crucial.

Research has identified that the highest moment of maximum force when playing Squash, Racquetball or Badminton coincides with the moment you play your shot. Therefore you need shoes with the best grip, control and support at this crucial moment. "Saxon shoes are designed specifically to do just that."
